Introduction

Thank you for downloading Code Writer, an app that makes it easy to edit text and code files using a tabbed document interface and powerful code editor.

As a first time user, please read these quick tips before continuing on.

Add Document Screen

The next screen you see will be the **Add Document** screen. This screen allows you to create a new document, browse to open an existing document, or recent and recent document. Upon choosing one of these options, the **Editor** screen will appear.

Editor Screen

The **Editor** screen is a chrome-free document editing surface. It has many of the advanced editing features found in popular IDEs. Display the app bars (**Windows+Z** or swipe from the top or bottom of the screen) to access the tabbed document interface and commands for the currently-selected document.

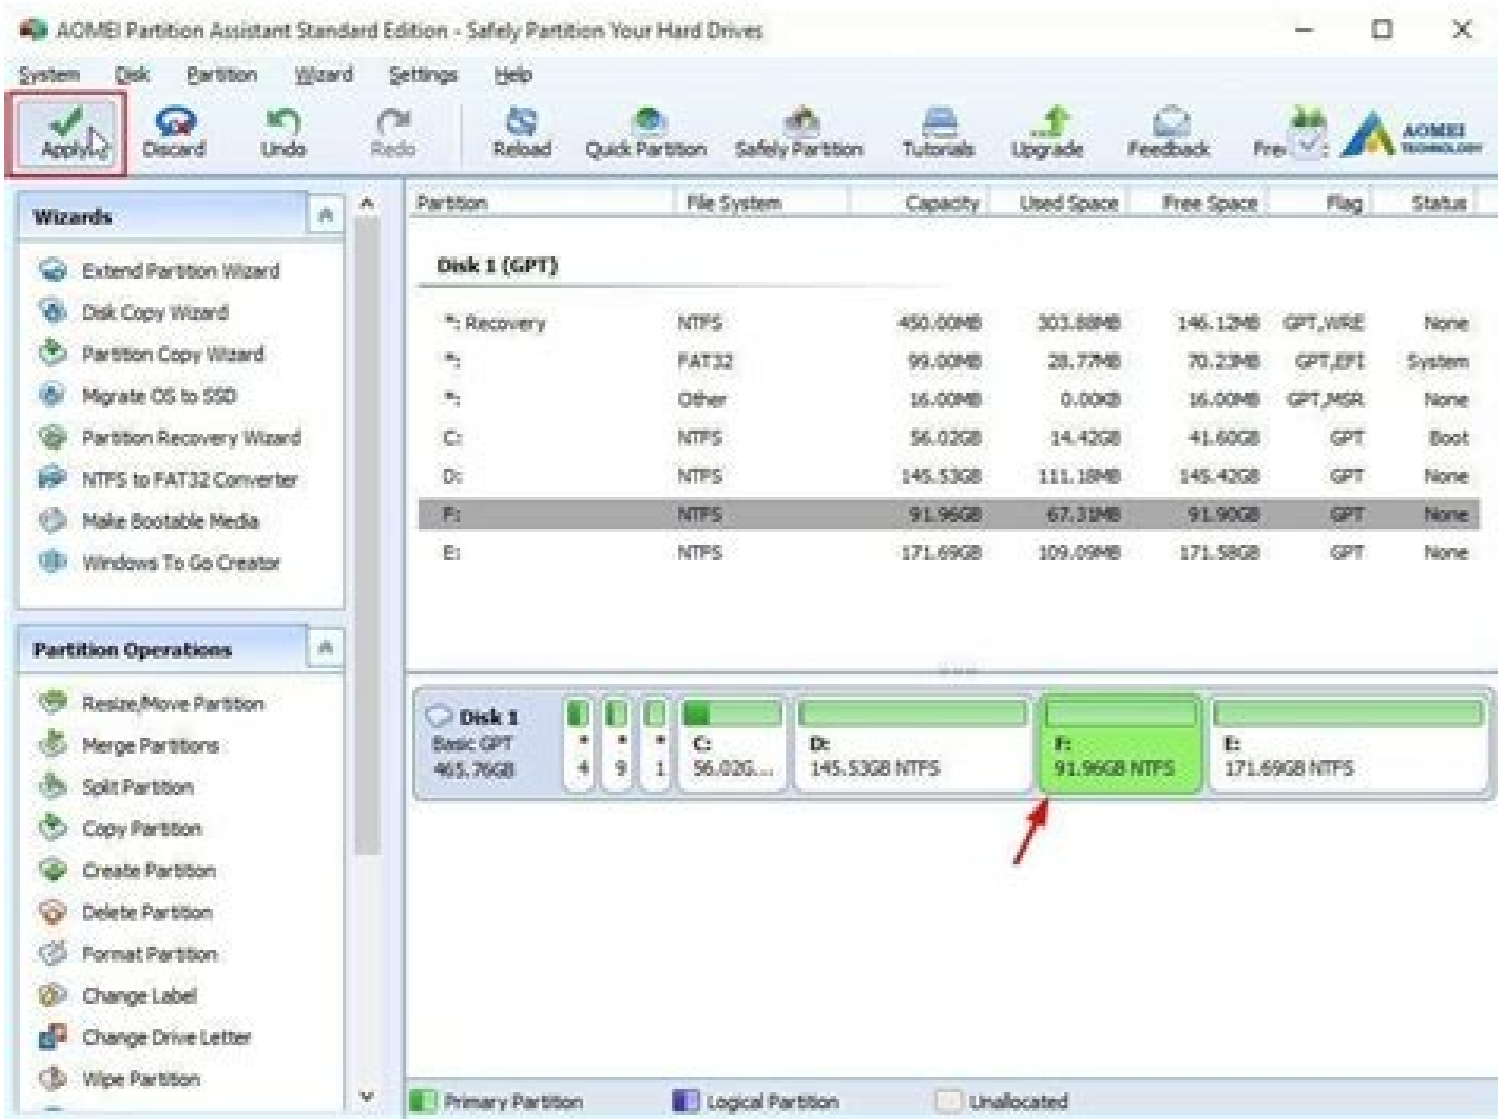

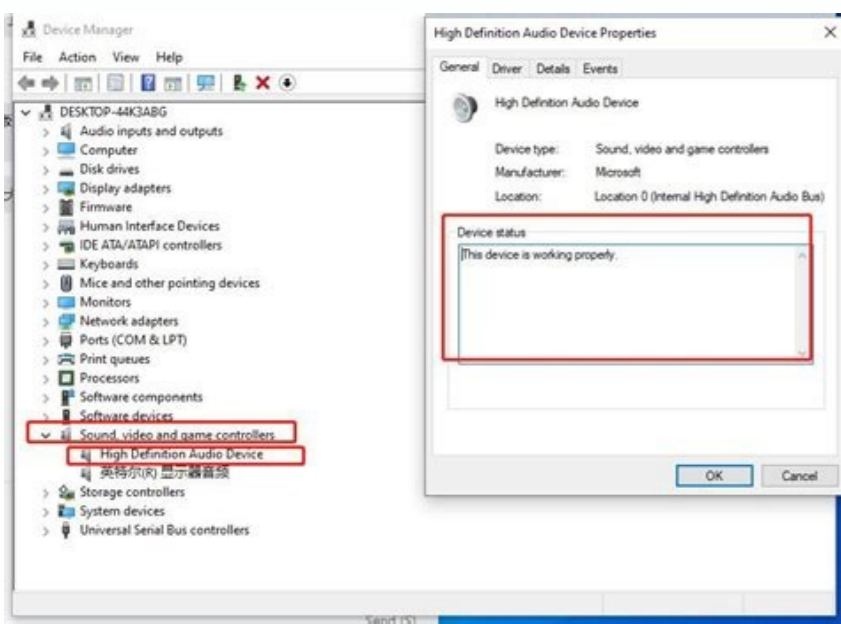

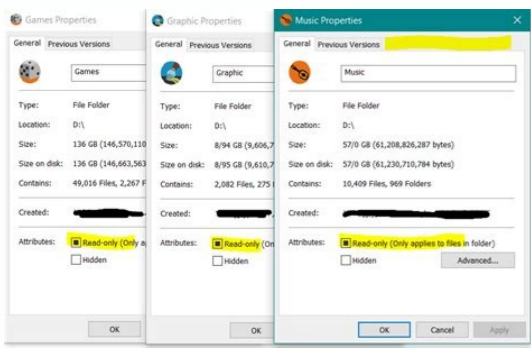

Settings and Documentation

Access the app's **Settings** (**Windows+I** or swipe from right screen edge) to configure options, such as current theme and which file types are supported, or access the **Help** screen.

The **Help** screen (also accessible via **F1**) contains detailed documentation for the app. Be sure to read through it to discover more app features!

This introductory screen will not show again.

[Get Started](#)

This course is now fully released with 12-hour 1080p, PDF and HTML live formats. Even more practice what you should see, common exercises for students, exercises 26. If you're not sure yet, talk to a development or development manager for an additional perspective. Build an app. Great idea! It could be. Review of the symbol Exercise 38.
