Within blocks of text, there are two ways to define the layout of paragraphs. paragraphs blocks are set flush left with a blank space in the middle. This is the default browser, and how the paragraphs you are reading now are set. Block paragraphs are common for business documents. For short documents, block A paragraphs suggest freshness precision and speed, but in a long sequence, Bringhurst warns that may appear Â ¢ soulless and uninviting.Â ¢ The other option is that of paragraphs set to run vertically along with an indentation of the first line to separate them visually. This is a very nice way to set long-law, and is common in novels and magazines. If you take this approach, complimentary opening paragraphs flush left, then returned the following paragraphs. (The pseudo-selector: first-child is your friend!) Text Indent should be at least 1/2 em, and 1 and m is more common in composition. In my opinion, Microsoft word, s default is too intent. Bringhurst is more generous, and allows for up to 3 ems.Rules of ThumbAim 45A to 75 characters (including spaces and punctuation) for the text line.
