* Review the weight loss plan including BCS, ideal weight, feeding volume and measuring of food before making any adjustments.
 ** For dogs less than 10kg it is recommended to use Satiety Small Dog.

PRODUCT BENEFITS

EFFECTIVE WEIGHT MANAGEMENT

Promotes safe weight loss and helps avoid weight regain. 97% of dogs lost weight in 3 months.

BEGGING CONTROL

High natural fibre level keeps dogs satisfied between meals. Helps control begging in 83% of dogs during weight loss.

MUSCLE MASS MAINTENANCE

High protein content helps support healthy weight loss while maintaining muscle mass.

Royal canin satiety dog feeding guide. Royal canin satiety wet cat food feeding guide. Royal canin satiety weight management feeding guide. Royal canin satiety wet dog food feeding guide. Royal canin satiety small dog feeding guide. Royal canin satiety cat feeding guide. Royal canin satiety support cat feeding guide. Royal canin satiety support feeding guide.

I am very happy with it. It is recommended to split the daily intake into two separate meals. Analytical Constituents: Protein 30%, Fat content 9.5%, Crude ash 5.8%, Crude fibres 17%. This is why close monitoring by your veterinarian is required to regularly update the food quantity ration and ensure continued weight loss. Nutritionally balanced. Enriched with nutrients (in particular, protein, minerals and vitamins) to compensate for the effect of energy restriction during a weight loss program. Ensure your dog is always provided with clean, fresh water. Reduces hunger: A special blend of fibres increases the volume of stomach contents and promotes satiety by reducing the spontaneous consumption of food. Nutritional additives (per kg): Vitamin D3: 140 IU, E1 (Iron): 5 mg, E2 (Iodine): 0.2 mg, E4 (Copper): 1.9 mg, E5 (Manganese): 1.7 mg, E6 (Zinc): 17 mg. High protein: A high protein content (111g/1000kcalME) helps maintain muscle mass during a weight loss program. I confirm that my pet was examined by a veterinarian who recommended the use of this Royal Canin Veterinary Diet on the basis of their diagnosis; I understand that it is recommended that I seek veterinary advice at least every 6 months regarding the usage of this Royal Canin Veterinary Diet; and I understand that I need to seek immediate veterinary advice if my pet's condition deteriorates in any way whilst I use this Royal Canin Veterinary Diet. Always provide plenty of fresh drinking water. Dog's weight (mix feeding guidelines) Start - dry (g) 4 weeks after if no loss achieved - dry (g) Maintenance after weight loss - dry (g) 10kg 148 126 139 12kg 169 145 159 14kg 190 163 179 16kg 210 180 198 18kg 229 197 216 20kg 248 213 234 25kg 293 251 277 30kg 336 288 317 35kg 378 324 356 40kg 417 358 393 45kg 456 391 430 50kg 493 423 465 55kg 530 454 500 60kg 566 485 533 70kg 635 544 599 80kg 702 602 662 90kg 762 657 723 Ingredients Composition: Vegetable fibres, dehydrated poultry protein, wheat gluten, tapioca, maize gluten, hydrolysed animal proteins, wheat, maize, animal fats, beet pulp, fish oil, minerals, psyllium husks and seeds, soya oil, fructo-oligo-saccharides, glucosamine, marigold extract (source of lutein), hydrolysed cartilage (source of chondroitin). It is recommended that a veterinarian's opinion be sought before use or before extending the period of use. Prior to prescribing, individual target weight should be determined. This is achieved through a combination of high protein and a special blend of fibres. Satiety Support enables your dog to receive a 32% larger portion than your average high-fibre weight loss diet. By purchasing this Royal Canin Veterinary Diet you acknowledge and agree that the following is true and accurate. Royal Canin Canine Satiety Weight Management is formulated for weight loss in dogs and designed to help reduce hunger. *L.L.P.: protein selected for its very high assimilation. Analytical constituents: Protein: 30% - Fat content: 9.5% - Crude ash: 5.7% - Crude fibres: 16.5% - Metabolisable energy: 2866 kcal/kg (NRC85). 3 Reviews Hide Reviews Show Reviews 5 Palatable Posted by Tami on 30th Aug 2021 My dog is quite picky, but has transitioned to this food easily. This pet food is a veterinary diet. Veterinary Diet Customer Declaration Veterinary diets are carefully formulated to assist with the treatment or management of a particular illness or condition. 5 Satiety dog food Posted by Adam on 22nd Dec 2020 Great product 5 satiety weight mangment Posted by kevin Rust on 27th Jul 2020 great product and has help with weight control of both of our dogs Dry food Composition: Vegetable fibres, dehydrated poultry protein, wheat gluten*, tapioca, maize gluten, hydrolysed animal proteins, wheat, maize, animal fats, beet pulp, fish oil, minerals, psyllium husks and seeds, soya oil, fructo-oligo-saccharides, glucosamine, marigold extract (source of lutein), hydrolysed cartilage (source of chondroitin). Nutritional additives (per kg): Vitamin A: 19000 IU, Vitamin D3: 1000 IU, Iron (3b103): 35 mg, Iodine (3b201, 3b202): 3.5 mg, Copper (3b405, 3b406): 11 mg, Manganese (3b502, 3b504): 46 mg, Zinc (3b603, 3b605, 3b606): 137 mg, Selenium (3b801, 3b811, 3b812): 0.06 mg - Preservatives - Antioxidants. It also aids with the feeling of fullness as well as improving palatability. Bone and joint health: Specific nutrients (including omega 3 fatty acids (EPA & DHA), glucosamine and chondroitin) help support healthy bones and joints placed under stress by excess body weight. You should seek the advice of your veterinarian before feeding this diet to your pet. The guidelines are a starting point and your pet may need more food depending on age, activity level and temperament. Recommended for (indications): Obesity Being overweight Diabetes mellitus (both normal and overweight dogs) Hyperlipidaemia associated with obesity Weight Management Not recommended for (contraindications): Pregnancy, lactation and growth Chronic disease requiring an increased energy intake Feeding Guide Feed according to the below table - total daily recommended intake. The amount of food necessary to induce weight loss can vary between individual dogs. Nutritional additives: Vitamin A 19000 IU, Vitamin D3: 1000 IU, E1 (Iron): 35 mg, E2 (Iodine): 3.5 mg, E4 (Copper): 11 mg, E5 (Manganese): 46 mg, E6 (Zinc): 137 mg, E8 (Selenium): 0.06 mg - Preservatives - Antioxidants. Analytical constituents: Protein: 8.5% - Fat content: 2% - Crude ash: 1.5% - Crude fibres: 2% - Moisture: 83% - Metabolisable energy: 602 kcal/kg. It doesn't upset her stomach and is helping manage her diabetes. Wet food Composition: Meat and animal derivatives, cereals, derivatives of vegetable origin, minerals, oils and fats, molluscs and crustaceans. The energy allowance (kcal) per kg target body weight is based on the dog's body condition score (BCS) however this is only an initial indication.

This complete and balanced diet promotes satiety—meaning it provides a feeling of satisfaction, which helps your dog feel full between meals and be less likely to beg. Its high fiber content helps reduce dogs' tendency to want to eat spontaneously throughout the day, and glucosamine and chondroitin supports joint and bone health. To cater to each dog's individual preferences, ROYAL CANIN® Canine Satiety Weight Management is also available as wet food in a delicious loaf. It is essential to accurately follow feeding rations as prescribed by your Veterinary Practice and it is recommended to use digital food scales for measuring the daily food allowance. More regular walks, an occasional swim or a good run in the park will work wonders. Feeding Guide: Feeding requirements will vary based on your pet's level of. To cater to each dog's individual preferences, Royal Canin® Canine Satiety Weight Management is also available as a ...
