Challenges companies are facing when deploying and using machine learning from 2018, 2020 and 2021

China's Manufacturing Growth Slows to Post-Lockdown Low

Purchasing Managers Index (PMI) of China*

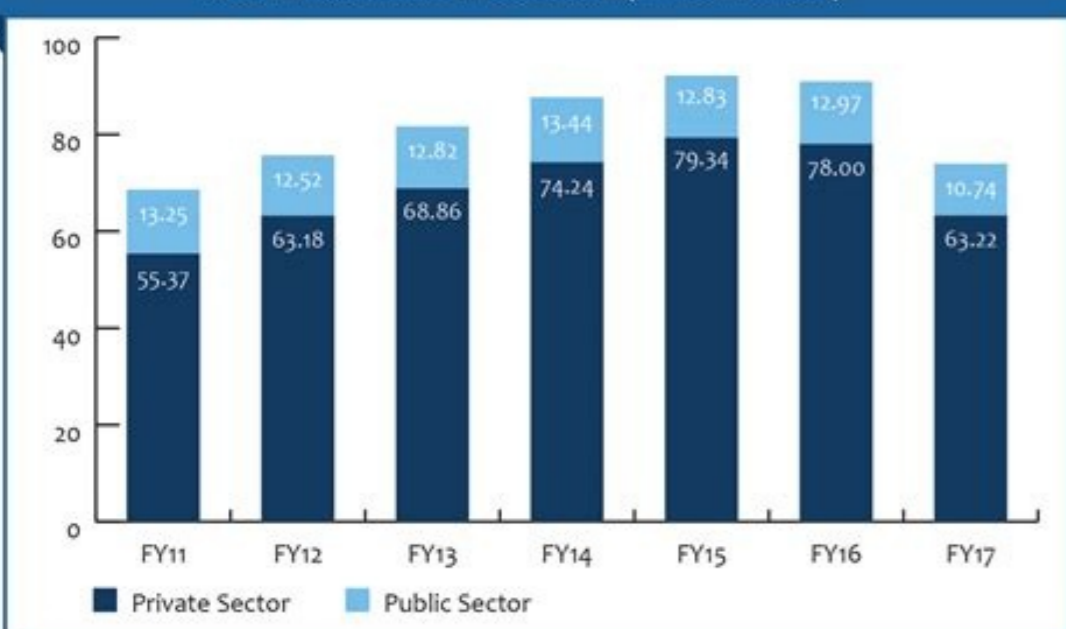

* A PMI reading above 50 percent indicates that the manufacturing economy is generally expanding; readings below 50 percent indicate a contraction.

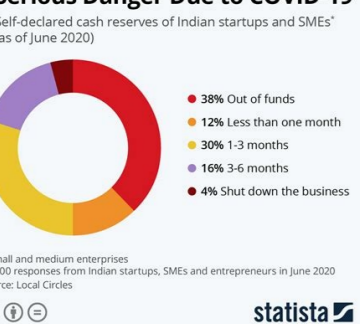

Source: National Bureau of Statistics of China

Total Finished Steel Production (Million Tonnes)

Half of Indian Startups In Serious Danger Due to COVID-19

In the second quarter of 2021, India's smart TV shipments increased by 65% on YoY due to increased expansion activities by original equipment manufacturers (OEMs) for their smart TV. The government predicts that the electronics manufacturing sector will reach ~US\$ 300 billion (Rs. 22.5 lakh crore) at 2024. Consumers usually browse websites, read comments and consumer videos before making such purchases. A general digital channel of interest within the hardware category will grow to represent more than US\$ 3.8 billion in purchases up to 2025. The policies and frameworks of the government of India, such as the relaxation of licensing rules and the approval of 51% Foreign Direct Investment (FDI) in multi-brands and 100% in non-brand retail, are some of the major engines of growth for the consumer market. Despite the growth of the online channels, the general public will remain the largest channel within hardships and will continue to be so until 2025 also. Demand for electronic hardware in India is expected to reach US\$400 billion by fiscal year 2014. In India, the number of individuals who have access to TV and the number of viewers per week reached 836 million in 2019, compared to 762 million in 2018. According to a report by Care Ratings, equipment and consumer electronics manufacturers are expected to increase their output by 5-8% in fiscal year 2022, after witnessing a contraction in demand in fiscal year 2021. The digital consumer economy is expected to reach US\$800 billion in 2030, compared to US\$85-90 billion driven by the rise of online shopping. Download our app now! For example, in July 2021, Omthing announced its target to capture 5% of the wearables market in the next three years. India's earphone market revenue is projected to reach >US\$77 million in 2027 at a CAGR of 4.7%, driven by the growing wireless headphone supply among consumers. In December 2020, service provider DTH Dish TV India Limited partnered with on-demand video platform Hungama Play to expand its content. Consumers are actively opening up the video in their shopping experiences in all categories and are eager to do the same in durable goods, he added. In the next four years, these companies are expected to feed a total output of >US\$ 21.64 billion in the DTH industry is expected to witness a growth of up to 6% for Rs. 22,000 crore (\$2.9 billion in) in the 21-year fiscal year. In October 2020, television manufacturers such as Samsung, LG and Sony obtained licenses from the government to import finished TV sets into India. In October 2021, consumer goods demand increased by 15% in Navratri (from 7 to 14 October 2021), due to increased demand for smartphones, televisions, refrigerators and clothing during the festival. Most of these investments are expected to take place in the next 2-3 years; after that, the local production of components for air conditioning (ACs) and LED lights is expected to start. In September 2021, the Chairman of FICCI's Electro-Manufacturing Committee, Mr. Manish Sharma, said that ~52 companies had applied for the concession of PLIs to white goods manufacturers, proposing an investment of ~Rs. 6,000 crore (\$813 million) in the manufacturing of components for air conditioning (ACs) and LED lights. There is a large growth margin from the rural market, with consumption expected to increase in these areas. The PLI scheme, which has been approved for 16 electronics companies, including 10 manufacturers esauQ esauQ .setnacirbaf so arap labolg levAm oEAsAudorp ed ortnec mu sAap o ranrot ed ovitejo o airtnemelpmoc e labolg levAm odacrem on aidnA ad lepap o siam adnia airarohlem .saralulec senofelet From consumers are viad before buying and 49% of consumers are willing to experience commerce offers from Veheo for Electronics. Technological actors such as Play (a technological brand) are concentrated in exploring the Indian consumer electron market, developing the manufacturing base of electrolytic components in India and encouraging export.
