## Game of thrones episode 3

Warning: Can only detect less than 5000 characters!imperfections, the game of the throne has become a TV phenomenon that has an average of 45 million spectators per episode in the eight season. That last season presented in 2019 and the show managed to keep the audience hooked to his weekly versions in a way that was not able to get many properties able to get from the Netflix streaming model interrupted tradition UNIQUE-EPISODE-A-WEEK WITH THE COMPOSITION OF THE RELEASED RELEASED-ON-ONCE ALL-EPISODES ALL-EPISODES Not only that, the show saw a rebirth of the fantasy genre on TV. And, with it, the release of many titles in a similar vein has arrived, all with comparable themes and aesthetic and the goal of becoming the next game of the thrones. Recently, the Netflix witcher, Apple TV + À ç ä ~ à "e s See, the Amazon Rail carnival row, its dark materials tried to collect where I was interrupted. It could be that the next game of the thrones end up being another property in the same game as Thrones Universe created by Martin. After deploring a sequel to Untitled Go 'Safquando Starding Naomi Watts at the end of 2019, HBO has not specifically avoided Greenlight other spinors. At this time the network and streaming service has six thrones' game titles in the works. The closer to a release date is the prequal house of the dragon, co-created by Martin and Ryan Condal (Colony) and set 300 years before the events to get. The show, which should launch in 2022, tells the story of House Targaryen. But there are five other HBO sequels in various development phases. There is a project set of 90 years before the events of Game of Thrones and based on Martin's novels on the Dunk Knight and his Squire Egg. There are another prequel that focuses on the queen of the Nymeria warrior, an ancestor of House Martell. There is a spectacle of the ladies of the tides and the head of the Velaryon house, a character who is also expected to appear in the dragon house. Then there is a show set in the bottom of the fleas, the poorer garrriage district in the landing of the king. And finally, there is a series of animated drama. And if everything you don't move enough, I would always have the theater. Martin is working on the development of a game of Game of Thrones game for Broadway, which should launch in 2023. The show will include characters known as Ned Stark and Jaime Lannister and will be established during the Great Tourney in Harrenhal, 10 days a sumptuous tournament that It was carried out 16 years before the start of the throne match. More than a group of prequel and a theatrical game, many fans think that the game of logs needs is just a better ending. The writer at the great James Hibberd of the Hollywood journalist has a theory that is not so antiqued as initially we thought. It is foreseen for the book of Martin Number of his ice song and series of fire, the winds of winter, to be released in the near future. The number of book seven although a spring dream, would conclude the series and has no a date of launch in sight. "He told me that there will be some very significant differences between books and show," Hibberd explained for the end of Martin. "Once George is finished there will be" judging from the duration of his last pair of books - about 2,000 pages of new ice song and fire material and HBO has the rights for those books. A HBO will not do anything with those books? "Hibberd talks about the possibility of not a new season Otto of Game of Thrones, but something framed as the vision of Martin of the end of an ice and fire song; something based on books that Weren is available when the show is over For the first time. Needless to say, there are many questions about the fact that this could be possible or not, one of them is the difficulties in combining an original cast that could appear several years. It still seems something that is definitely willing to look. look.
