Pureguardian humidifier cleaning instructions

Instructions for cleaning your humidifier: Wash the spray cap, spray spout and water tank lid (the lid on the bottom of the blue tank) with a mild dishwashing soap, rinsing well and drying thoroughly. The blue water tank can be rinsed with warm water and dried. Drain any excess water from the base area. The ultrasonic disk should be cleaned frequently, using diluted white vinegar. Let the diluted vinegar soak in the disk area for 4â€³5 minutes, then use the brush provided and gently clean the disk. Do NOT scrub. Drain any excess diluted vinegar and dry with a soft cloth. You can use diluted vinegar and wipe the rest of the base of the humidifier. We do not suggest running anything through the humidifier. ©2007 Guardian Technologies LLC-E-10 E-11PROBLEM SOLUTIONWater vapor and humidity are not produced.Power Plug: Unplug and then try again.PowerFailure:Whenthepowerisreturned,tryagain.Tank Installation: Make sure the tank is correctly attached.The surface of the ultrasonic disk is dirty: Clean ultrasonic disk. (see pg. E-8)Air blows but water vapor is not produced.ExcessiveWater:Removeacertainamountofwaterfromthetank.Increase mist setting.Detergentresidueand/oroilngredientsfromcosmetics,etcmaybeintank. wash out tank and try again.The surface of the ultrasonic disk is dirty: Clean ultrasonic disk. (see pg. E-8)If you use hard water, replace with softer water.Humidity level is low.The surface of the ultrasonic disk is dirty: Clean ultrasonic disk. (see pg. E-8)The water in the unit is too cold: Replace with cool, but not cold water.Damageonthetransonicdisk>ContactCustomerService1.866.603.5900Warm humidity is not produced.It may take 10-15 minutes before warm humidity is created. The mist may not feel warm due to the fact it is so fine and is cooled rather quickly from the air in your home. Test by either feeling the base of the unit which should be warm to the touch or by allowing the unit to run for approximately30minutesonwarmsettinginaclosed200sq.footroomor smaller. The room should feel moderately warmer if the unit is working properly.The humidity has a bad smell.Poor maintenance or dirty water: Clean the product thoroughly, and fill it with fresh water. (see pg. E-8)White dust is forming on nearby furniture.Hardwatermaydepositacertainamountof dust.Dustintheairalsosettles because of added humidity in the room. Use distilled water if this becomes a nuisance.*DecalcificationFilter(FLTDC)availableatwww.guardiantechnologies.com or through Customer Service 1.866.603.5900.Unit has stopped working.No or low water.
