Atp 2-01.3. Atp 2-01.3 intelligence preparation of the battlefield. Atp 2-01.3 ipb. Atp 2-01.3 pdf.

El DA es la agencia del gobierno federal dentro del cual se organiza el Ejército de los Estados Unidos, y que está dirigido por el Secretario del Ejército que tiene autoridad legal (10 U.S.C. § 3013) para llevar a cabo sus operaciones y redactar un reglamento para su gobierno, de acuerdo a los límites de la ley, las directrices de la Secretaría de la Defensa y el propio Presidente de la Nación. It also outlines the functions of planning requirements and assessing collection. Chapter 3 discusses the development of requirements, the identification, prioritization, and refining of gaps in data and relevant information, and knowledge concerning the operational environment that must be resolved for the commander to achieve situational understanding. Chapter 4 describes the development of planning requirements tools. Depending on the mission, time available, ongoing operations, and standard operating procedures (SOPs), units may develop techniques for abbreviated information collection planning to meet the commander's needs. It also discusses considerations when operating in urban and non-temperate environments. The Department of the Army is the Federal Government agency within which the United States Army is organized, and it is led by the Secretary of the Army who has statutory authority (10 U.S.C. § 3013) to conduct its affairs and to prescribe regulations for its government, subject to the limits of the law, and the directions of the Secretary of Defense and the President. El Departamento del Ejército, en inglés Department of the Army (DA), es uno de los tres departamentos militares dentro del Departamento de Defensa de los Estados Unidos de América. It also addresses the linkage between planning requirements and assessing collection, the military decisionmaking process (MDMP), intelligence preparation of the battlefield (IPB), and targeting. Although the discussions and descriptions in this manual may seem linear, planning requirements and assessing collection is a dynamic, continuous, and interactive process requiring constant interaction between the commander and staff. It expands on the principles in FM 3-55. It outlines the preparation of planning requirements tools during the conduct (planning, preparation, execution, and assessment) of operations. This publication provides details on the four continuing functions of planning requirements and assessing collection. ATP 2-01 should be used in conjunction with FM 3-55 and with FM 2-0. The Department of the Army (DA) is one of the three military departments within the Department of Defense of the United States of America. ATP 2-01 establishes doctrine for the specific tasks under planning requirements and assessing collection. It includes techniques for developing planning requirements tools and keeping them current throughout an operation. Readers should be familiar with fundamental doctrine contained in ADPs 2-0, 3-0, 5-0, and 6-0 and ADPs 2-0, 3-0, 5-0, and 6-0. ATP 2-01 establishes doctrine for the specific functions under planning requirements and assessing collection. The information presented is descriptive, not prescriptive or restrictive. This manual complies with Doctrine 2015 guidelines. Chapter 1 discusses information collection and its tasks, planning requirements and assessing collection, task and direct collection, and execute collection across the echelons and the vital role of the commander and staff. Chapter 2 describes how the commander provides the staff with inputs necessary to perform planning requirements and assessing collection and how the staff develops their respective running estimates, requests for information, and requirements. However, it describes the optimal process. These tools, developed by the intelligence staff, begin the process of synchronizing the information collection plan with the scheme of maneuver and are updated as the scheme of maneuver changes. Chapter 5 discusses assessing the information collection plan, providing feedback to information collection assets, and retasking of assets. Chapter 6 discusses the process of updating planning requirements tools and updating or revising the information collection plan to remain synchronized with operations. Chapter 7 discusses the considerations for planning requirements and assessing collection when conducting offensive, defensive, and stability tasks. Chapter 8 discusses the considerations for planning requirements and assessing collection for urban, mountain and cold weather, jungle, and desert environments. Appendix A discusses joint, national, and multinational intelligence, surveillance, and reconnaissance (ISR) planning considerations. Appendix B provides tactics, techniques, and procedures for requesting aerial collection. It addresses factors to consider when supporting offensive, defensive, and stability tasks.

7/1/2022 - 07/01/2022 12:12 Actualizado a 07/01/2022 13:49 El equipo español disputará por segunda vez en tres ediciones la final de la ATP Cup, que en este 2022 tiene lugar en Sídney. 1/1/2022 - El equipo de Serbia venció por 2-1 a Noruega en el inicio de la ATP Cup y llegará al duelo con Chile con la posibilidad de alcanzar la clasificación a los cuartos de final del evento que se desarrolla en Australia. A primera hora, Filip Krajinovic (42º de la ATP) superó al noruego Viktor Durasovic (345º) por 6-2 y 7-5. Luego, Casper Ruud hizo valer su favoritismo e igualó el...
