Clear all data from android phone

How do i clear data from my android phone. How to clear all data from android. How do i clear all data from my phone. How do i delete all data from my android phone.

If you're resigning your old phone, or simply delivering it to a loved one, you want to make sure all your personal data is completely deleted before doing it. We have described the process in case you are going to you from an iPhone, and if you have an Android phone, this is what you need to know. Please note that exact steps vary depending on the version of Android that you are using and the device manufacturer. The settings are slightly different in the versions of Android and the manufacturer's skins can change the names of the exact settings or menus. However, the general instructions are the same in all devices. The microSD card is the first decision needed to make it is the microSD card. In the event that your old phone has a microSD card, you can simply insert the card into your new phone and continue to use it - most data like photos, videos, etc. You should be migrated seamlessly. In case your new phone does not have a microSD card slot, or you would not like to carry out the card for some reason, you need to delete all the data on the card formatting it. First, backup of all your photos and videos. Connect your phone to your computer with a USB cable. If you are on a Mac, make sure you have the Android file transfer application installed before doing so. Open my computer on your PC, or Finder on your Mac. Go to the SD card and copy all the files you want to save on your computer. After performing the copy, you can disconnect the phone. Now you can format your memory card. On the phone, go to Settings> Storage. Scroll to the bottom and tap Cancel SD Erase. You will see a warning message that tells you that you will lose all the card data. Touch the Erase SD card button to continue. If your SD card is fixed with a password, you need to enter the PIN to continue. A determined person can still recover your files from a formatted SD card, but the easiest way to deal with this is for "stratification". Just enter, fill the space with something else, eliminate it and repeat this process a couple of times and your original data went forever. For example, if you have a 2 GB microSD card that you canceled - reconnect it to the PC and copy a file that is about 2 GB on the card. Immediately delete the file. Do it again, two or three times. The whole process should not take more than ten minutes, but you can also sell the card safely. Backing on data on your most important thing to do is to make sure you don't miss any of your contacts or images. Good thing with Android is that you need a Google account to configure the phone and back up your device backup. To ensure that this is the case, do the following. On the phone, go to Settings> Backup and Reset. You should see a backup call setting of my data. Make sure it is popped. Then press back, then scroll down to account. Touch on Google. You will see your Google account that has been used to configure the phone with a green synchronization symbol next to it. Touch the account. Make sure all the options are checked - this will use your Google account to synchronize everything from your calendar to the contacts for the e-mail to the photos you take, which are automatically performed on Google+. Not all versions of Android backup automatically images. We checked a Samsung Galaxy 2011 note and we didn't see the option, while the recent motorcycle and has this option. In the event that the phone does not support this, you will need to use a PC to back up media via USB as described above. Back up other multimedia files on your computer by connecting the to the PC using a USB cable. Follow the steps in the first half of the SD card section above to copy files to the computer. (See also: A, How to back up your Android smartphone) This option will also run the application data for some of your apps. Apps must be recorded with the Android operating system for this backup and restore service to work, and not all your apps could support it. Be safe, we us Manually backing the application data for all your favorite apps, such as this method for backing up your WhatsApp.Delete messages everything you have a backup, you can safely delete everything on your phone. This is what you do.First, completely delete the SD card as discussed previously or remove and keep it safely if you plan to use in your new phone recovery. Simple factory cancast everything on your phone, but these data can Still being recovered from a very determined user. If you want to be really sure that no one can recover data even after it has been deleted then make sure to enable the phone's hardware encryption. For most people it should be sure to skip steps 1 and 2 and go directly to step 3.1. Go to Settings> Security and tap Encrypt phone. This takes a long time, so you need to connect the phone to the charger for Proceed.2. Tap Encrypt phone again to proceed. Some people have noticed that sometimes this doesn't work right away, and you may need to try a few times.The process can take an hour, so you will need to leave your phone on the charger and wait.once this is done, enough Restore the phone: 3. Go to Settings> Backup and Reset. Touch the restoration of factory data. On the next screen, check the box marked to delete the phone data. You can also choose to remove data from the memory card to some phones - so you are careful to what the ON.4 key is touched. You will see a warning screen - Tap Restore Phone a Continue.5. This process can take a few minutes and the phone should restart the state that has shipped in which you are asked to choose the language and access in everything again.congratulations, you have deleted all the data on your Android phone.restoring files on another phoneif You have followed the above procedure in supporting properly, then you should be able to get all your data without any difficulty. First, if you are continuing to use the old microSD card in the new phone, then your movie, music and photos are transferred automatically .otherwise, when you get your new Android phones, log in with the same Google account for reporting Contacts and other data, and transfer files from your computer using the USB cable in the same way in which you copied to your computer as described Above. In case you are switching to an iOS device, you can still synchronize Google Account synchronization To transfer the contacts and calendar, while you can use iTunes to transfer files.if backup media you have found this tutorial useful, check more in our HOW TO section. If you have suggestions that can help you safely delete Android phones, let us know through the comments. All data on the device will be deleted. These instructions may not be precise for all Android devices; Check the manufacturer's instructions or search for the web, if necessary. To delete all data from the Android operating system device: Open settings, and then tap System. Tap Reset and then restore factory data. Tap Restore the phone. Protect your Android OS device there are dozens of Probably hundreds of Android phones today on the market. Some of them are exclusive for specific vectors, some of them are available throughout the world, but only some of them are at the head of their class. This week we wanted to know which Android phones you thought were the best available, not just because a high-end proprietor or hardware checklist complete, but why do you think you offer one overall experience. Here is a look at the top five Android phones, based on your nominations. At the beginning of the week, we asked you what Android phones that you think it was the best. There are many sites willing to tell you what the phones are the best based on the chips inside, the camera, storage or version of Android pre-installed, but those things are not always added to an excellent user experience. We asked you which phones "past or present - thought was the best, and over 300 nominations later, we returned to highlight the first five.The survey is closed and the votes are counted! To discover discover Of the five contenders took the first prize based on your vows, go to our Alveario Five Follow-Up Post to find out and discuss the winner! Looking for a decent Android phone? Of course, we know that the market will be completely different within a reading of Moresamsung Galaxy NoteSoften indicated as "Phablet" because of its inclusive and massive stylus super amoled display 5.3 ", the Samsung Galaxy note (AT & T, \$ 299 W / contract) is enormous, but many of you praised to mix the portability of a phone with some real estate goods from desperately necessary tablets. The 8MP and 2MP rear and front cameras and the 1.4 GHz double-core processor do not damage The issues, and while it is certainly not the right size for everyone, those of you who have a love, and others do not see the time that comes its release on other couriers. Furthermore, even if the note galaxy ships with Android 2.3 Gingerbread pre-installed, there are many ROMs available to take it to the Sandwich Ice Cream Android 4.0 or simply replace the touchwiz interface of Samsung entirely.HTC One X / STHE HTC One Series is the most recent activiv Or HTC to recreate himself, not the company really needs "most people who have used HTC devices love them and the HTC One X and one s are not exceptions to the rule. The only X (AT & T, \$ 199 W / Contract) is the new HTC tip phone, the 4.7 "sports screen, a quad-core NVIDIA Tegra 3 (internationally) or a dual processor -Core Qualcomm Snapdragon (US / Canada). Android 4.0 ICE Cream sandwich (with UI Sense HTC on top), built-in audio beats and a 8 MP rear camera with a 1.3pp front camera. HTC One S (T-Mobile, \$ 189 W / Contract) On the other hand, it is a 4.3 "slightly smaller screen, a 1.5 GHz double-core processor, 8MP rear and VGA front cameras, audio beats and ice cream sandwich. Both devices are thin, the Powerhouse devices designed to report the Focus Android Lovers back to a group Select high-end HTC devices, instead of dozen-plus HTC released in the past. So far. And vice versa), which has not stopped the galaxy S and the Galaxy S II to sell millions of units around the world. The Galaxy S was one of the first Android dual-core smartphones, and certainly one of the first to present the new (at the time) Samsung's super love display, offering bright and crispy colors even in intense light. It is still available for a song depending on the courier you take it from (in the United States, it was sold under the vibrating name (T-Mobile), Captivate (AT & T), fascinated (Verizon Wireless) and Epic (Sprint) In both 3G and 4G variants.) Party apart, the Samsung Galaxy S II is the current model of the company and has a super amoled 4.3 "display, a 1.2 GHz double-core processor, and While it was shipped with Android 2.3, most vectors slowly rolling upgrades to bring the device to Android 4.0. The price varies depending on the courier and the variant that you take, but one thing is certain: When it was launched, most people considered the Galaxy S II the best Android smartphone € â,- "if not the best smartphone € â,-" available on the market, which makes the fury on the next Samsung Galaxy S III that the much stronger.Droid series of Motorola Motolorathe Droid (Motorola Milestone, live International llo) was one of the first Android phones on the market actually carrying Android to the Messe - and surely the first Android phone available on Verizon wireless at the moment. Has been Hard call to group the Droid series together, but it is worth noting that those of you who named the Droid line in large numbers specifically mentioned the cursor models, not the Candybar models such as the Droid RAZR, Razr Maxx, or Bionico (Although all have all strong nominations), all available on verizon wireless in the United States. United. Motorola Droid 4 (VZW, \$ 199 W / Contract) is the current phone iteration, with a 4 "QHD display, a 1.2 GHz double-core processor, a 8 MP rear back and front cameras from 1 , 3 MP and in particular, a slide The backlit keyboard that allows the phone to be used in portrait and landscaping mode without sacrificing the real estate screen. The Droid line is still one of the few high-end Android devices to present a physical keyboard, making it popular both for the portability and with people who prefer physical keyboards to those on the screen. The Droid 4 Sport Gingerbread Android and Rides Verizon Wireless' 4G Network.Samsung Galaxy Nexusthe Samsung Galaxy Nexus (VZW, Sprint, \$ 199 / W Contract, \$ 399 unlocked) is the current official "Google Phone," having launched with the Android 4.0 ice cream sandwich and currently acts as an Android flagship device. Sport has a 4.6 "super amoled display, a screen Curved outline, a 1.2 GHz and 5MP double-core processor and 1.3 MP and front cameras. It is a pure google experience, which means that the phone is (largely) free of bloatware and other apps pre-installed by vectors and producers, and lacks Samsung's ui ui level ui level in favor of a clean version Sandwich ice cream. The phone also sports the Google NFC payment system, Google Wallet. The camera boasts a zero shutter LAG, and it was the first phone to launch with the pre-installed ice cream sandwich, and it's still one of the few devices you can get this. If you want the true and more pure Android experience, or you want an Android phone that is officially supported by Google, this is. This to. There is true, the first five Android phones, based on your nominations. Now it's time to vote for all out of champ.it it was difficult this week to run the first five considering that there are three Samsung devices in the race, but some of them have obtained more nominations than some other combined contenders. So we can combine ignore the fact that many of you have a strong opinion on these specific models. Do you have the thing to say about the candidates we've lost? Does your favorite phone does not have enough nominations to include? Remember, the first five are based on your most popular nominations from the call for the contenders thread from previous week. Share your thoughts in the comments below. The five hive is based on the reader's nominations. As with most Hive Five posts, if your favorite tips+hivefive@lifehacker.com!
