But for the interior designers, they make sense. According to Klugh, the grouping of books by color can create a sense of order. If you don't need to refer to books often, Klugh says, Rainbow is an aesthetically pleasant format. Walker says it in any other way: the "color coded shelves calm the visual disorder". As for the order that the rainbow spectrum should enter? Emilie Dulles' method by Dulles Designs is to go from dark to light, from bottom to the top - with black books, dark blue and coal on the upper shelf and white books on the upper shelf. In the middle like colors. Even if you are not creating a complete rainbow spectrum, Klugh recommends grouping books for Hue to integrate the room palette. 5 of 20 organize in alphabetical order or by gender designers agree that if the books are not moved from the shelves often, the coding of the color is the most aesthetically pleasant path. But it's not always the most functional. "When your collection is extremely large and cited often, having an organizational system that simplifies the search for that you are looking for when you need it becomes more important. In these cases, opt for the organization of your collection in alphabetical order for Author or by gender, therefore the author if the collection is complete ", says Michele Vig, founder and organizer leader with Neat Little Nest. 6 of 20 thinks in odd numbers Klugh recommends working with odd numbers when you decorate shelves with objects. He illustrates an example using vases: get a high pot, a vehicle, a round pot and a small and large pot. Or, get three objects of the same color but different plots. "Heat the objects and group them so that yes itutt itutt ,ottegoss rep otnemappurrgar la acitebafala enoizazzinagro 'llad ilibacat e idigir enitrepoC out li arapes 02 id 7 isaV pohS .hguK ecid , "ortla'lla itnavad onagnopparvos is ehc odom ni ,onu emoc their organizational strategy. But to create a sense of visual balance, consider separating your hardcover and paperback. "Take your curfew on shelves and your scraps down. Not only will the organization be better, but it will also allow you to distribute weight evenly," Andrew Barker, founder of Homeowner Costs, says. 8 of 20 layers, layers "Layering provides height and interest on your shelves," Carissa Miller, interior designer and founder of CC and Mike Creative, says. It is recommended to stack books and place a box or candles at the top of the stack. The same trick works for artwork and framed photos. "Art can also be layered nicely by framed a white and abstract family photo larger or simpler, with a smaller piece of art framed in front of it," he says. Shop Candele 10 of 20 Show your collections and "Travel Treasures" I don't know what to do with that collection of glasses or shells? Collect them for their debut on your libraries. "Whatever your interests are, it is good to bring them together, in this way they have the greatest impact," says Klugh. It is recommended to put all travel souvenirs together for travel reminders. Michiel Perry of Black Southern Belle takes a step forward. He puts travel books on a specific place next to objects from that place. For example, two rocks from a Aegean beach with a travel book on Greece. 11 of 20 Doing Pop Things with Colorful Glass Glass is equally great for dinner parties and for adding pop of vibrant elegance to bookcases. "Colored glassware can also add an unexpected source of delight to your shelves," says the glassmaker Cheryl Saban, founder of Saban Glass. Shop Glass Colored 12 of 20 Use the rule of two-thirds To avoid overcrowding, Klugh recommends using the "rule of third". Keep each shelf two full thirds, allowing some empty space, or a place to put an object or two. The slightly light objects, like the paperback books, should go to the top. "You want to feel like it was well rounded," says Klugh of the shelf. Shop Art Books 18 of 20 think in themes when objects to be gathered on the shelf, the designer Courtney Turk recommends thinking about themes - both colors, materials, places or topics. "Each piece must not" combine "but if everyone understands the same theme, something cohesive takes shape of course," she says. 19 of 20 Put your favorite books in front and in Central 20 of 20 take a photo of your final design that your shelves will move over time. Make you use at the best taking a photo when you're done. In this way, you can always restore them to their best appearance. Look.
