Calc clean philips azur performer plus

Fabric Shaver

Philips azur performer plus calc clean instructions. Philips azur performer plus price.

It is placed the iron on the CALC CLEAN container on a uniform and stable surface. Extract the wheel from the Easy De-Calc and let the water with lime particles flow into the container. CAUTION: Do not interrupt the process by raising the plate of the container Calc Clean, as we come out very hot and steam by the sole. You must carry out the Calc Clean process to continue ironing with steam. When the Lime Elimination Process is completed, the Pitar shall leave. Continue until the water deposit is empty and the lime particles have come out. Thoroughly cleans the steam generator once a month to prolong his life. Perform the elimination of lime deposits when the Easy De-Calc pilot begins to blink. During the Calc Clean process, hot water and steam on the sole, and brief beeps were sounded. The steam function will be deactivated automatically if the anti-calc cartridge is not replaced. In that case, you should leave the cartridge exhausted in the compartment. When it does not fall water, it squeezes the roller wheel to the right. Performs the process of eliminating the lime deposits on a regular basis to prolong the useful life of the apparatus and optimize the ironing performance. With the Calc Clean container that is provided, you can eliminate lime deposits easily and get clean steam. When completing the elimination process of lime deposits, the stroke of the Light. If the apparatus was being used and very hot, let it cool completely (two hours as a manual) before continuing. To avoid the risk of burns, ensure that the appliance has unplugged at least two hours and that it has cooled completely. It eliminates lime deposits when the corresponding pilot flashes and the apparatus emits a beep. Squeeze the wheel again in your Turn on the steam generator and wait five minutes. Fill the deposit of water halfway and lights the appliance. Very important: carries out the elimination process of lime deposits as soon as the Easy De-Calc pilot begins to blink and the apparatus emits a continuous sound. Do not interrupt the process of eliminating lime deposits (approximately two minutes). Replaces the anti-calc cartridge when the lime elimination pilot flashes and the apparatus emits a sound. With the new SMART Calc Clean function, you will be reminded that you must eliminate the lime deposits of the appliance when necessary. Important: Wait five minutes to empty the container as it is heated during the CALC CLEAN. cleaning process click on the VEGO to see how much it is. With the new SMART Calc Clean function, you will be reminded that you must eliminate the lime deposits of the appliance when necessary. Tilt the base, extracts the wheel from the Easy De-Calc system and pours 500ml of water inside. Thoroughly clean your ironing center at least once a month to prolong your life. After one hour, the steam function will be deactivated automatically. ** It is completely sure to leave the iron on this container throughout the process. Mant down the "Calc Clean" button for two seconds until you hear short beeps. He waits approximately five minutes so that the container is cooled and poured the collected lime particles and the hot water in the sink. To avoid the risk of burns to occur, make sure that He has unplugged at least two hours and that he has cooled completely. I hear short beeps. Click on the VEGO to see how it is and follow these steps. Remove the plate from the ironing platform and opens the anti-calc cartridge compartment. Take the rubber pad from the bottom of the anti-Calc cartridge. Mant down the vapor button while plating a piece of cloth forward and towards the iron. When the process of eliminating the lime deposits is completed, the tubing iron. You can continue ironing with steam for an hour while the CALC CLEAN pilot flashes and the device emits a beep. Do not leave the apparatus unattended during the Calc Clean process. press the anti-Calc cartridge in the compartment until it clicks into place and then closes the lid. The steam function will be deactivated automatically if the lime is not removed. Extract the wheel from the Easy De-Calc and let the water with lime particles flow towards the cup. It eliminates lime deposits when the pilot flashes and the apparatus emits a beep. Place the iron on the Calc Clean container on a uniform and stable surface. Place the plate stably on the Calc Clean container. Place the ironing center on the edge of a table or sink and place a cup under the wheel of the Easy De-Calc. The new Smart Calc Clean function will remind you that you must eliminate the lime deposits of the apparatus when necessary. Place the iron on the Calc Clean container on a uniform and stable surface. He places the Calc Clean container on the ironing board or any other uniform and stable surface. After between one and three months of use, the CALC CLEAN pilot starts blinking and the device emits a beep to indicate that Carry out the Calc Clean process. Wait approximately two minutes. Turn the temperature control to the position "Calc Clean". Do not leave the apparatus unattended during the process. Make sure you always have the container at hand to eliminate lime deposits to enjoy greater comfort when you carry out this process. Make sure that the steam generator is cold before removing lime deposits. If you do not want to replace the anti-calc cartridge, you should use demineralized or lime water from IronCare. Vacuum the water of the Easy De-Calc system when the iron is cold. It carries out the elimination process of lime deposits as soon as the CALC CLEAN pilot begins to blink and the apparatus emits a continuous sound. * Turn the temperature control until the CALC CLEAN position. Do not interrupt the elimination of lime (about two minutes), minutes).
