Using the GetInstallerPackageName () Method, the Android AUTO application verifications to see the source of installation Application before it allows it to be shown on the Android Auto panel. I really like the Spotify Premium Apk app, but when I download it, my phone tends to fail, so where can I get the Spotify Premium APK so that it does not fail? Enable It.Plug your phone on the computer and change it from ä € œjust loadingä € mode for ä € œtransference (MTP) ä € œMode.No your computer, navigate to the directory where you extracted the Binario add.Bet the last Spotify APK file (or any other application has not worked for you) from xda labs or where you choose, and save this file ä € œSpotify.apkä € (or other fan name Cy) Remember, depending on the application) on your phone. The part of the command ä € œCaminho / forä € should be replaced by the real place where you saved the SPOTIFY APK. Any help I would appreciate a lot. If not, then you can simply run this command to check the installation source: PM List Packages -l somewhere in the skirt you will find the package es € " And the installation code package next to him. Low: Spotify installed from the system packet manager. Why does this happen, and what can be done about it? We hope this corresponds to any problems you may have had spotify, or another application, to be recognized by Android Auto. Top: Spotify installed from the Play Store. I do not know why Android Auto requires an application to be installed only from Google Play Store, but this act left many confusing users. If you are running Android Nougat and higher, simply open the application setting page to see if it specified the installation source correctly. Find the number of compilation and tap it 7 times to enable developer's options. Now enter developer options and find USB debug. If software requires you to pay Use it, then pay for it. Now, if you re-execute the ADB Devices command, the terminal will print the number of your device. Left: Spotify Spotify From the Play Store. If it is written ä € œcom.android.Vendingä € , then you are ready. You can blame the Android Auto application for this. For Windows users, simply hold Shift and click on the right mouse button and you will see an option ä € œOpen Command command prompt hereä € as an option. When you are at the command / terminal prompt, type the following command: ADB Devicesyou Will See that The System is starting the adb daemon. XDA does not support discussions about using paid applications without making payment. Right: Spotify installed from XDA Labs. For example, if it is located in the Download folder then /sdcard/download/spotify.apk would be what you would insert. However, it has many ätosis resources that we can also enjoy. As soon as you enter the command, it will return one ä € œSucessoä € if you have installed the application successfully. For those of whom you are fortunate to own a vehicle with Android Auto Built-in integration, some of you may have come across a very annoying problem when trying to get certain music applications like Spotify to work. He only refuses to appear on the panel. Doa thread closed. ADB, which means Android Debug Bridge, is a tool designed for developers to interact with their smartphones to debug the device. Fortunately, through the use of an ADB command, we can still load the Spotify application (or any other application) while telling the system to deal it as if it had been installed from Google Play Store. Any application that requires payment has to be paid. Hello friends, I'm a student and I'm very passionate about music. I am currently listening to many different musical gains.
